NUTRIBAR Tech Brief

The innovation is about a newly developed ready-to-eat (RTE) **food bar**. It contains carbohydrates, soluble dietary fiber, & protein.

It is targeted at people who require quick energy, but do not have time for a meal.

It can be used as energy source during athletic events like marathon, triathlon, and other events, and outdoor activities.

It can be the immediate food supply following a storm, earthquake, flood, or other disaster emergency.

It can be an on-the-go snack of busy individuals, vacationers, and military personnel.

Interested takers are welcome to apply as partners who will manufacture and distribute this technology through a licensing agreement.
