PHILIPPINE NUCLEAR RESEARCH INSTITUTE

NRD INFORMATION BULLETIN No. 16-02

July 7, 2016

USE OF SECURE TAGS ON PNRI LICENSES

ADDRESSEES

For Information - All Philippine Nuclear Research Institute (PNRI) Licensees

PURPOSE

This Bulletin is issued to inform all PNRI Licensees that the Nuclear Regulatory Division (NRD) has implemented the use of PNRI License Secure Tags as an added security feature for all licenses starting July 2016. The purpose of using the license secure tags is to protect the Facility and Radioactive Material Licenses from fraud or counterfeiting and malicious tampering.

DISCUSSIONS

With the issuance of PNRI Office Order No. 007 dated 05 May 2016, the Nuclear Regulatory Division is directed to use secure tags on PNRI facility and radioactive material licenses (New, Renewal, and Amendment) starting July 2016. This tag is an added security feature of the existing PNRI License to protect the radioactive material license from fraud, counterfeiting and malicious tampering. This can also be used to validate the identification and status of a particular licensee in any device with internet connection.

The use of the PNRI License Secure Tags has the following features:

- a) Unique code for validation of license;
- b) Eliminate fraud or counterfeiting;
- c) Online verification (checking) of license details.

Please refer to the attached PNRI License Verification Easy Guide.
