

PHILIPPINE NUCLEAR RESEARCH INSTITUTE

Q3 2023 Customer/Client Satisfaction Survey (CCSS) Report

I. Introduction

The PNRI Customer/Client Satisfaction Survey (CCSS) Form (PNRI-CSM-01) is a measuring tool developed to quantify customers' satisfaction level and quality outlook on the different services offered by the Philippine Nuclear Research Institute both internally and externally. It is grounded on eight (8) service quality dimensions as revised effective July 1, 2022, namely: (1) **Responsiveness** (Delivery of prompt service or within the prescribed/agreed time); (2) **Reliability (Quality)** (Service or product conforms to the set requirement); (3) **Access & Facilities** (Condition of facility; Availability of equipment); (4) **Communication** (Staff is polite while delivering the service); (5) **Costs** (Value for money, preferred methods of payment, timely billing); (6) **Integrity** (There is honesty, fairness, and trust in each service); (7) **Assurance** (Able to perform the service correctly; provides right solution or advice to the problem or concern); and (8) **Outcome** (Realization of the intended benefits).

This quarterly report is a consolidation of all CCSS conducted by the different sections of the organization with their respective services for the period of July to September 2023 (Quarter 3 2023).

II. Methodology

The PNRI CCSS Form (Annex A) is given to all external and internal customers every after completion of the service/s availed. A sample copy of the form is attached. For the Nuclear Training Center (NTC) (Annex B and C), a separate customer satisfaction form is administered tailored fit for the kind of services they offer. Sample copies of the forms are attached as annexes in this report.

The PNRI-CSM-01 Form is divided into two parts, namely the Customer/Client Profile and the Customer/Client Satisfaction Survey. The Customer/Client Profile section of the survey gathers data regarding the general profile of the client which includes their name, age, sex, contact number, address, the type of customer/client, the name of their company/organization, and the specific PNRI service they have availed with which they are giving the rating to. On the other hand, the Customer/Client Satisfaction Survey section details the eight service quality dimensions mentioned above that the customers/clients must rate using a 5-point Likert scale ranging from very satisfied to very dissatisfied.

The survey respondents were composed of all external and internal clients as well as all other interested parties using and intends to use radioactive materials and/or avail other technical and non-technical services of PNRI (considered as external clients) as well as interested parties within the organization (internal clients). Weighted average is used in the analysis of the survey using the number of respondents in each respective service as weights.

For the analysis of the survey, a 5-point Likert scale following the rating system below is used. The general Quality Objective (QO) of the organization is to achieve a Very Satisfactory rating.

Table 1: Rating system of the client satisfaction survey.

Range	Descriptive Rating
5.00	Outstanding
4.00 – 4.99	Very Satisfactory
3.00 - 3.99	Satisfactory
2.00 – 2.99	Unsatisfactory
1.00 – 1.99	Poor

III. Results and Discussion

Here, we detail and discuss the results for the third quarter of 2023's customer satisfaction survey. Table 1 shows the survey result of all external services in PNRI. There was a total of 628 respondents for the survey. They were primarily composed of private and public hospitals, companies, licensees, other government institutions, students, industries, private companies and individuals and the like. 22 external services across 13 service providing sections were tallied. Of the 13 sections, the Radiation Protection Services Section (RPSS) had the greatest number of external services at 5 of 6 services with a reported CCSS. The top three external services with highest average rating that had more than 20 respondents are Electron Beam Irradiation Services (38 respondents), GAMMA Irradiation Services (51 respondents), and Issuance of Certificate of Release (42 respondents). The first two services both attained an average rating of 5.0 while the third service attained 4.95 rating. The weighted average per service dimension are as follows: 4.89 for Responsiveness, 4.88 for Reliability (Quality), 4.54 for Access and Facilities, 4.89 for Communication, 4.83 for Costs, 4.90 for Integrity, 4.88 for Assurance, and 4.86 for Outcome. External services recorded a general average of 4.83, equivalent to Very Satisfactory.

Table 2 summarizes the result of the CCSS for all internal services. 14 of 18 sections delivered a CCSS report for Q3 2023. Overall, internal services gained a 4.90 average, with the following weighted average per service dimension: 4.91 for Responsiveness, 4.90 for Reliability (Quality), 4.82 for Access and Facilities, 4.94 for Communication, 4.87 for Costs, 4.89 for Integrity, 4.93 for Assurance, and 4.94 for Outcome. A total of 480 respondents were recorded. The top three sections with the highest averages (with more than 20 respondents) were the MISS (4.95 with 174 respondents), HRMRCS (4.93 with 126 respondents), and the Property and Procurement Section (4.89 with 28 respondents).

On the other hand, Table 3 tallies the CSS result for the Nuclear Training Center which use their own Customer Satisfaction Survey Forms tailored to the kind of services they offer. Copies of such forms are attached as annexes (Annex B to C) of this report for reference. NTC had an average of 4.54 from 3 of 4 services that they offer for Q3 2023. This data came from 139 respondents.

Table 4 is a summary of the result. A total of 1,247 respondents were recorded for internal and external services for the third quarter of 2023. In total, the average per service dimension for both external and internal services are as follows: 4.90 for Responsiveness, 4.89 for Reliability (Quality), 4.66 for Access and Facilities, 4.91 for Communication, 4.85 for Costs, 4.89 for Integrity, 4.90 for Assurance, and 4.89 for Outcome. With the inclusion of results from NTC, PNRI received an overall CCSS average of 4.83 for the period covering July to September 2023 (Q3). This is 0.2% lower than the previous quarter but still a very satisfactory rating.

Figure 1 is a distribution of all external respondents across different external services. The Guided Tour of PNRI Facilities service of the Nuclear Information and Documentation Section (NIDS) recorded the most number of respondents at 77 or 12% of the total number of respondents followed by the OSL Personnel Monitoring Service at 58 or 9%, and the NTC External CSS at 57 or 9% of the total. Overall, there were 628 external respondents recorded for Q3 of 2023.

Figure 1: External Respondents Distribution for Q3 2023

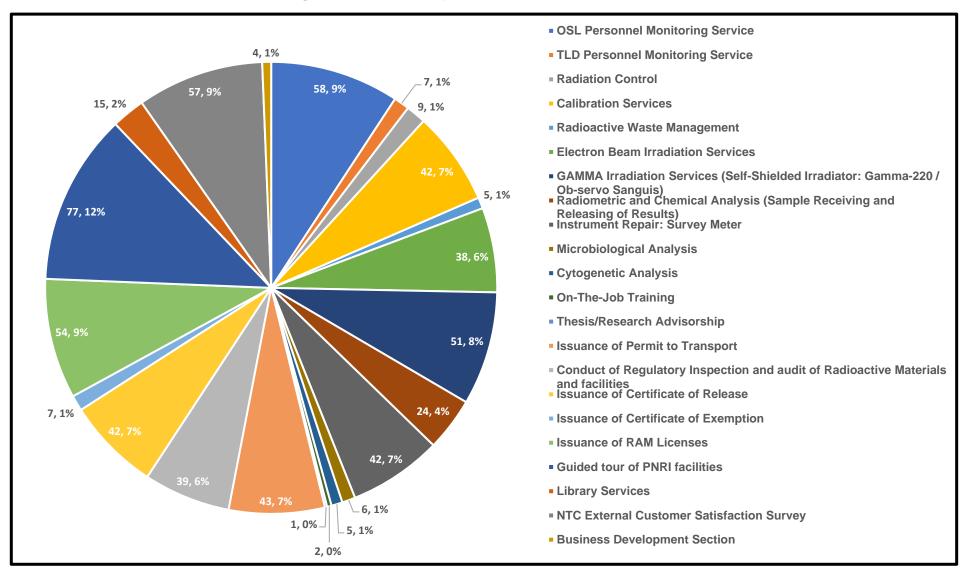

Figure 2 is a visual representation of the distribution of internal respondents. A total of 480 internal respondents were recorded. The top three sections with the most number of respondents came from the Management Information System Section (174 respondents or 36%), followed by Human Resources Management, Records and Communication Section (126 respondents or 26%), and General Service Section, with 42 or 9%.

Figure 2. Internal Respondents Distribution for Q3 2023

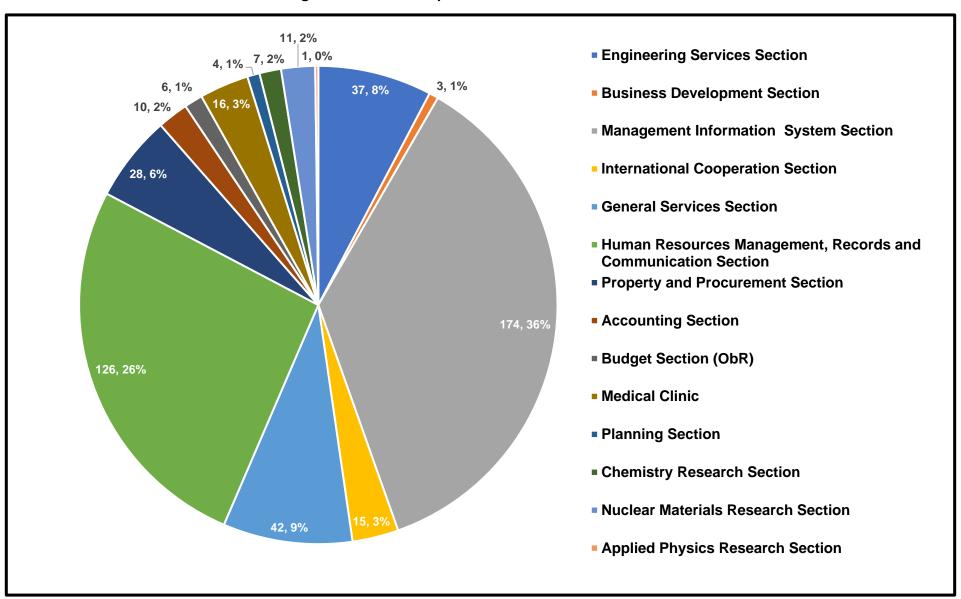

Table 5. Services with no CCSS Report

10 of 46 (26%) services did not have a CCSS report for Q3 of 2023. Table 5 summarizes and details these services as well as the reasons why there were no CCSS reports made. Most of the services were not available for Q3 of 2023.

Service Provider	Service Delivered	Remarks

AND	Biomedical Research Section	No services rendered
	Health Physics Research Section	No services rendered

IV. Summary

PNRI received a "Very Satisfactory" rating of 4.83 for the third quarter of 2023 (period covering July to September 2023). This result is well within the Quality Objective of the organization. The average per service dimension for all external and internal services are as follows: 4.90 for Responsiveness, 4.89 for Reliability (Quality), 4.66 for Access and Facilities, 4.91 for Communication, 4.85 for Costs, 4.89 for Integrity, 4.90 for Assurance, and 4.89 for Outcome.

For external services, services that had more than 20 respondents, the three services with the highest average rating were the Electron Beam Irradiation Services (38 respondents), GAMMA Irradiation Services (51 respondents), both of which attained a 5.00 average rating, and Issuance of Certificate of Release (42 respondents) with 4.95 rating. On the other hand, for internal services, the top three sections with the highest averages (with more than 20 respondents) were the Management Information System Section (4.95 with 174 respondents), Human Resources Management, Records and Communication Section (4.93 with 126 respondents), and the Property and Procurement Section (4.89 with 28 respondents). 10 of 46 (22%) services did not have a CCSS report for Q3 of 2023. A total of 1,247 respondents were recorded for this quarter.

PNRI is steadfast in its commitment to provide quality to all clients and customers. The result of this survey shall be a benchmark in developing and creating more dynamic and innovative action plans towards the continuous improvement of the Quality Management System and the organization.
